Liquidity
DEX - UniV3
Main pair - USDC/RAP
Listing price - 0.00185 USDC per RAP
All initial liquidity was locked by multisig

Distribution schedule & methods
Community - Over 3 years at the founders discretion.
Breakdown
1) Active community member rewards
2) Participation incentive rewards
3) Airdrops during community events.
4) Airdrops to large $RAP holders monthly.
5) Community Grants

Treasury - Over entire project existence
Breakdown
1) Liquidity provider rewards and incentives.
2) NFT Acquisition.
3) Partnerships.
4) Payments for services in $RAP.
5) Community lead governance decisions.

Team Share
Team share is distributed monthly after a 12 month lock and then evenly for the next 24 months, totalling a 3 year schedule, which begins after the $RAP HEADZ PFP collection is launched indefinitely.

40% of the Team share goes to the core team Sourav Deb, Sky Hayward, Main dev, Secondary dev, main designer plus additional core team.

The other 30% goes to team members helping us grow through executing tasks such as the SANDBOX build, the game build, Dapp builds, Onboarding specialists

The remaining 30% is saved for partnerships

Use Cases

The token will be bought and sold to interact with services from the international community.

- Listing services for $RAP at a small discount
- Purchasing services for $RAP with a discount
- We will incentivize those to use $RAP to buy and sell through $RAP-back rewards, where the seller gets 10% $RAP back from each sale and the customer gets 5% $RAP back from each purchase.
- Services will be found on a Token-gated directory
- We will have aToken-gated community calendar. This calendar will let members snipe dates to promote their releases. Only one release slot will be available on the calendar per day. This will encourage members to not release music/events on the same day so the community can share each other's work. We will incentivize post sharing through offering 1-10 $RAP for each event/release shared on twitter.
- Purchasing NFTs and selling NFTs with $RAP will be announced soon
- More use cases will be added as we grow.
- Some of the use cases may be replaced or removed, depending on how the community receives them

Token Stability

To further incentivize $RAP to be stabilized, we will have the services & the Calendar available in a token gated database which will only be accessed through holding a combination of 50,000 $RAP **AND** a FOUNDER NFT (Membership), which will be switched to a $RAP HEADZ PFP (Once the contract is Live indefinitely)
